

PROFILE

Final-year Business Computing student focused on full-stack development and AI integration. Hands-on experience designing web and network monitoring solutions, with a strong interest in SaaS applications, automation and turning business problems into digital solutions.

EXPERIENCE

Developer intern — network monitoring — Moov Africa

Ouagadougou

- Designed and built a network monitoring web application in Python / Flask (SQLAlchemy, MySQL).
- Automatic device discovery (Nmap, parallel ICMP ping) and SNMP collection: availability, latency, CPU, RAM, interfaces.
- Full incident lifecycle: threshold alerts, tickets with per-priority SLAs, automatic three-level escalation, email notifications.
- SLA / MTTR reports exported to CSV and PDF; scheduled jobs for monitoring, backups and data retention. Application validated in a lab environment.

PROJECTS

FasoCommerce — SaaS management platform for shops and services (pre-launch)

Since June 2026

Next.js · TypeScript · FastAPI · PostgreSQL · Docker

- Modular monolith architecture: 15 modules switched on per trade (retail, restaurant, dry cleaning, driving school, garage).
- Offline-capable point of sale, Mobile Money payment, WhatsApp orders, thermal printer receipts.
- Quality: 207 backend tests (pytest), end-to-end and accessibility tests (Playwright), continuous integration (GitHub Actions).

ForexSaaS — Decision-support tool on market data

Python · FastAPI · pandas · Celery · Next.js

- Collection → analysis → scoring → alerts pipeline fed by three data sources (Twelve Data, FRED, Finnhub).
- Confluence and confidence scores, per-pair risk calculation, backtesting on historical data.

Taxi Compteur — Mobile app (academic project)

Flutter · Firebase

- Real-time rides between customers and drivers, GPS tracking, distance-based fare.

SKILLS

Backend	Python (very good), Flask, FastAPI, Laravel (intermediate), REST APIs, JWT authentication, SQLAlchemy, Celery
Frontend	JavaScript (good), TypeScript, React, Next.js, Angular (intermediate), HTML, CSS, Tailwind CSS
Mobile	Flutter, Firebase, Ionic (basics)
Data	SQL, PostgreSQL, MySQL, Alembic, Redis, pandas
DevOps and quality	Git, GitHub Actions, Docker, pytest, Playwright, Vercel, Netlify
Networking	Nmap, SNMP, ICMP, TCP/IP, monitoring
AI and automation	Scheduled jobs, data analysis, API integration, workflow design
CMS	WordPress

EDUCATION

Bachelor's degree (3rd year) — Business Computing

2025–2026

Université de l'Unité Africaine (UA),
formerly IAM

CERTIFICATIONS

Office and design — Word, Excel,
PowerPoint, Canva

LANGUAGES

French — Fluent
English — Intermediate
